

Counting slices

Bridge course, unit 11

NAME

Check the slices are the same size before you add anything. Where they are not, write both fractions again in matching slices first — that is the whole of the work.

1. $\frac{1}{5} + \frac{2}{5} = \frac{\square}{5}$. What goes in the box?

2. $\frac{2}{6} + \frac{3}{6} = \frac{\square}{6}$. What goes in the box?

3. $\frac{3}{8} + \frac{3}{8} = \frac{\square}{8}$. What goes in the box?

4. $\frac{3}{5} + \frac{1}{5} = \frac{\square}{5}$. What goes in the box?

5. $\frac{4}{5} - \frac{3}{5} = \frac{\square}{5}$. What goes in the box?

6. $\frac{4}{6} - \frac{1}{6} = \frac{\square}{6}$. What goes in the box?

7. $\frac{5}{6} - \frac{3}{6} = \frac{\square}{6}$. What goes in the box?

8. $\frac{2}{5} + \frac{1}{5} = \frac{\square}{5}$. What goes in the box?

9. $\frac{1}{5} + \frac{3}{5} = \frac{\square}{5}$. What goes in the box?

10. $\frac{2}{3} + \frac{2}{4}$. Cut both into 12ths: $\frac{\square}{12}$. What goes in the box?

11. $\frac{2}{4} + \frac{1}{5}$. Cut both into 20ths: $\frac{\square}{20}$. What goes in the box?

12. $\frac{2}{4} + \frac{2}{5}$. Cut both into 20ths: $\frac{\square}{20}$. What goes in the box?

13. $\frac{1}{3} + \frac{4}{5}$. Cut both into 15ths: $\frac{\square}{15}$. What goes in the box?

14. $\frac{1}{3} + \frac{2}{4}$. Cut both into 12ths: $\frac{\square}{12}$. What goes in the box?
