

Two moments

Bridge course, unit 12

DATE

NAME

Two rows: how things were, and how they ended up. Say which amount did not change — that is what the drawing shows and the numbers hide.

1. Kato spends 30 shillings and has 28 left. How many shillings were there before?
2. Amina spends 15 shillings and has 12 left. How many shillings were there before?
3. Nabirye spends 39 shillings and has 11 left. How many shillings were there before?
4. Okello spends 28 shillings and has 29 left. How many shillings were there before?
5. Nakato spends 40 shillings and has 17 left. How many shillings were there before?
6. Wasswa gives away a fifth of their sweets and has 12 left. How many were there to start with?

7. Nakato gives away a quarter of their pencils and has 9 left. How many were there to start with?
8. Ssebba gives away a quarter of their pencils and has 21 left. How many were there to start with?
9. Apio gives away a fifth of their mangoes and has 36 left. How many were there to start with?
10. Apio gives away a fifth of their bricks and has 24 left. How many were there to start with?
11. Apio gives away a third of their sweets and has 26 left. How many were there to start with?
12. Apio has 23 pencils and Wasswa has 7. How many must Apio give Wasswa so that they have the same?
