

Carrying and borrowing

Bridge course, unit 8

NAME

Set every one of these out in columns, and before you start, say roughly how big the answer will be. That guess is the only thing that will catch a slipped digit.

1. $798 + 315$

2. $889 + 167$

3. $816 + 879$

4. $479 + 682$

5. $216 + 506$

6. $595 + 218$

7. Roughly, without working it out: $296 + 545$ is nearest to?

A) 800

B) 700

C) 80

D) 1800

8. Roughly, without working it out: $149 + 688$ is nearest to?

A) 1800

B) 700

C) 80

D) 800

9. $921 - 544$

10. $540 - 357$

11. $233 - 146$

12. $620 - 313$

13. $883 - 477$

14. $516 - 449$

15. Adding 352 and 492 in columns puts a small 1 at the top of the hundreds column. What is that 1?
- A) One, because the column was full
 - B) One ten, made from ten ones
 - C) Nothing; it is there to keep the columns straight
 - D) One hundred, made from ten tens
16. Adding 183 and 241 in columns puts a small 1 at the top of the hundreds column. What is that 1?
- A) One ten, made from ten ones
 - B) One hundred, made from ten tens
 - C) One, because the column was full
 - D) Nothing; it is there to keep the columns straight
