

Down the columns

Bridge course, unit 8

NAME

Work left to right, one column at a time, and say what the little number you carry across is worth. It is not the remainder until you reach the end.

1. $840 \div 7$

2. $792 \div 8$

3. $790 \div 5$

4. $492 \div 4$

5. $824 \div 4$

6. $498 \div 3$

7. $345 \div 5$

8. $403 \div 6$. What is the remainder?

9. $849 \div 9$. What is the remainder?

10. $295 \div 7$. What is the remainder?

11. $502 \div 3$. What is the remainder?

12. $957 \div 9$. What is the remainder?

13. $400 \div 3$. What is the remainder?

14. Dividing by 7, the hundreds column leaves 6 over and a small 6 is written in front of the tens digit. What is it?

- A) 6 tens
- B) Nothing; it is a reminder of where you are
- C) 6 hundred, coming across as 60 tens
- D) The remainder, 6
